Profile

I am a software developer with an architectural and design background. I possess a keen eye to detail,visual aesthetics and seamless user interactivity.My aim leans on combining my skills in tech and urban design to integrate diverse perspectives and a collaborative approach to the rapidly developing innovation processes.All this while incorporating the fundamentals of marketing strategy as well.

Professional Experience

Front end developer
Tusenti

Worked hand in hand with the front end development team to
• Continuously enhanced the user interface of the app to ensure optimal functionality and user satisfaction .
• Played an integral role in driving significant market growth by effectively promoting the app amongst target users..
• Optimized and streamlined the user interface code of Tusentis website resulting in a more intuitive and efficient experience for users..
• Exhibited a keen eye for detail and a creative mindset,thus contributing innovative ideas to the company.
• Conducted quality assurance checks on site updates so as to identify any technical or consumer-facing issues.
• Provided consultative services on web strategy and website governance leveraging expertise to deliver strategic guidance.

Intern
Ubrica internship program

Interned with the front end development team:
• Created proposed UI website and app designs for a delivery app called PIYOTERO using Figma.
• Worked on the frontend bit on an open source code of a crypto wallet app
• Integrated ui/ux design ideas to real life code.
• Effectively managed and worked on task assignments that were assigned.
• Successfully built and deployed pages within the content management system.
• Efficiently worked remotely with other developers and designers to ensure tasks were done on time.

Mentor
Technovation Girls centre

•Empowered and mentored younger girls to develop technological solutions for societal problems.
•Provided guidance on project ideas and approaches to problem solving.
•Facilitated for the growth and development of young girls within the mentorship program.

Urban designer/Architect
State department of Housing and Urban development

•Researched alot in the field for the early processes of proposed government based projects in Nairobi City.
•Made several maps that were accorded to spatial analysis,site surveys and Masterplans.
•Worked with environmentalists and GIS planners to produce spatial arrangements for the improvement of projects.
•Prepared information and drawings for analysis,reports including conceptual urban design documents.
•Provided technical expertise in Land use planning and work within a team of other engineers to complete land development and strategic planning projects.
•Perfomed projet reviews to determine compatibility with comprehensive plans.
